

Making an initial liability determination

Making an initial liability determination

To make an initial liability determination, there are number of steps that need to be completed.

In this section

Liability

- ✓ Legislative tests and initial liability

- ✓ Decision making under the SRC Act

- ✓ Making an initial liability determination

iClaim

iClaim is a decision support system on Pracsys used to determine initial liability for new workers' compensation claims.

International Classification of Diseases

When determining initial liability for a new workers' compensation claim, the claimed condition must be entered on Pracsys using a descriptor from the International Classification of Diseases.

Creating an initial liability determination

This section explains how to create an initial liability determination in Pracsys.
